Minerals

Randy McAtee and Shanna Weber can give you current mineral prices at 800-442-2809.
Progressive volume discounts available with 1 or 3 ton orders.

<u>Product</u>	<u>Best Use</u>	<u>Active Ingredient</u>
Green Pasture CTC 2800 (7501)	This product is an excellent mineral supplement for cattle grazing well fertilized seeded pastures that are moderately high in P (fescue, brome, bermuda, wheat, rye, crabgrass) during periods when grass tetany is not likely or when they are being fed harvested forage from the above types (when forage Phosphorus is greater than 0.25%) or when high P commodity feeds supply a large share of the Phosphorus requirement, or when high Phosphorus liquid feed is fed	Chlortetracycline 1.4gm/lb (2800g/ton)
Tetany Plus (7502)	Feed anytime the weather is cool and the grass is lush. This product is an excellent mineral supplement for cattle grazing cool season grass pastures that are likely to be deficient in Magnesium (fescue, brome, rye) during periods when grass tetany is most likely especially for cows in early stages of lactation.	Chlortetracycline 1.4gm/lb (2800g/ton)
Summer Fescue CTC 4000 (7503)	High levels of vitamins and trace minerals (especially zinc) make this an excellent mineral supplement for fescue pastures during summer months. Medicated for control of anaplasmosis and bacterial pneumonia when fed as directed.	Chlortetracycline 2gm/lb (4000g/ton)
Summer Fescue CTC 4000 with Altosid™ (7503ALT)	In addition to the beneficial effects of chlortetracycline this product contains Altosid™ insect growth regulator to prevent the development of horn fly larva in the manure of treated cattle	Chlortetracycline 2gm/lb (4000g/ton) + .013% s-Methoprene
Summer Fescue with Tasco (7504)	This supplement has all the benefits of our summer fescue mineral plus Tasco™ 14. Tasco acts to lower the body temperature of cattle grazing endophyte infected fescue during summer months, while improving fiber digestion and immune function.	
Breeders Choice Perfect 36 (7210)	Mineral and Vitamin Supplement for beef cattle on pasture. High levels of phosphorus, zinc, copper, selenium and vitamin E help ensure rebreeding success. High level of Vitamin A to help prevent eye problems associated with Vitamin A deficiency.	

Breeders Choice 36 CTC 5000 (7214)	Includes all of the features of Breeder's Choice Perfect 36 plus protection from Anaplasmosis and bacterial pneumonia.	Chlortetracycline 2.5gm/lb (5000 g/ton)
All Purpose Cattle Mineral P-8 (7205)	Economical 8% Phosphorus non-medicated mineral for all cattle. Especially useful to reduce mineral supplement costs from the end of breeding season until calving.	
Beef Mineral P-8 CTC 8000 (7215)	Our highest level of chlortetracycline for control of Anaplasmosis even when mineral consumption is less than ideal as we often see on dry, late summer grass. This is a special order product with 1000 lb minimum order size.	Chlortetracycline 4gm/lb (8000 gm/ton)
Provitamax 20% Pasture Supplement Meal (7401)	For Beef cattle on pasture. Use to supplement pastures when Anaplasmosis and grass tetany are not likely. Contains 20% crude protein to enhance palatability and supplement poorer quality forages.	
Provitamax 20% High Mag Tetany Meal (7402)	For Beef cattle on low Magnesium pasture and forages such as cool season forages during the period of rapid spring growth.	
Provitamax 20% Anaplasmosis Meal (7403)	Medicated for control of anaplasmosis and bacterial pneumonia when fed as directed	Chlortetracycline 500mg/lb (1000g/ton)
Provitamax 20% Anaplas+Tasco (7404)	Contains all of the features of our Provitamax Anaplasmosis meal plus Tasco 14, a specialized kelp meal that has been shown to improve fiber digestion and immune response and reduce body temperatures during heat stress.	Chlortetracycline 500mg/lb (1000g/ton)
Trace Mineral Salt (9807)	To be fed free choice to any animal at any time	
Stock Salt (9611)	To be fed free choice to any animal at any time
